SUMMARY

Full Stack Developer with 4+ years of experience building scalable SaaS platforms, e-commerce systems, real-time applications, and cloud-native products using React.js, Node.js, Python, GraphQL, and AWS. Experienced in architecting frontend systems, backend APIs, CI/CD pipelines, automation workflows, and scalable cloud infrastructure with strong focus on performance optimization, developer productivity, and business impact.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, Redux, HTML5, CSS3, Tailwind CSS, Material UI

Backend: Node.js, Express.js, Python, FastAPI, REST APIs, GraphQL, WebSockets, SSE

Database: MongoDB, DynamoDB, PostgreSQL, Supabase

Cloud & DevOps: AWS Lambda, EC2, S3, SQS, GitHub Actions, Azure DevOps, CI/CD

Automation & Tools: Playwright, Chromium, ETL Pipelines, Docker, Git, Postman

Commerce: Shopify Plus, Liquid, Shopify CLI, Storefront API, Admin GraphQL API

EXPERIENCE

Software Development Engineer II – Frontend Lead

Wednesday Solutions

Oct 2024 – Present

Pune, India

Senior Web Developer

Biz Lighting Pvt Ltd

Jul 2023 – Oct 2024

Gurgaon, India

Software Developer Intern

Cybrom Technology

May 2022 – May 2023

Bhopal / Bangalore, India

PROJECTS

Conduit Commerce – Multi Store Shopify Platform

2025 – Present

Conduit Commerce is a scalable multi-store e-commerce platform built for furniture and rugs brands operating across the US market. The platform solves large-scale storefront management, product onboarding, deployment automation, and custom product configuration challenges across multiple Shopify stores.

- Led frontend architecture and development across 70+ Shopify storefronts using React.js, Shopify Liquid, GraphQL APIs, and reusable theme systems.
- Built CI/CD deployment pipelines using GitHub Actions enabling automated deployments across multiple production storefronts.
- Developed Python + Chromium based ETL pipelines for automated supplier product scraping, transformation, and Shopify imports through Admin GraphQL APIs.
- Created automated QA testing workflows using Playwright reducing manual testing overhead and improving deployment reliability.
- Built custom product configuration system overcoming Shopify variant limitations through pricing APIs and custom cart workflows.
- Improved engineering execution using Azure DevOps sprint planning and deployment workflows improving release efficiency across teams.

Sage – Video Content Management SaaS Platform

2025 – Present

Sage is a SaaS platform built for financial advisors to manage, process, collaborate, and distribute video content through AI-powered workflows and real-time processing systems. The platform focuses on scalable video pipelines, collaboration workflows, and reducing operational cost through automation.

- Contributed to full-stack architecture using React.js, Node.js, Python/FastAPI, Supabase, and AWS Lambda based processing pipelines.
- Built REST APIs, GraphQL services, WebSocket communication layers, and SSE streams supporting real-time collaboration and live processing status tracking.
- Developed AI thumbnail generation workflows using FFmpeg and ML models reducing thumbnail generation cost from \$15 to \$0.20 per video.
- Implemented backend microservices and serverless AWS Lambda workflows for asynchronous video processing pipelines.

- Integrated Supabase realtime database, authentication systems, edge functions, and vector database infrastructure for scalable SaaS operations.

Eco LED Lightings & Biz Lighting – Headless Commerce Platform

2023 – 2024

Eco LED Lightings and Biz Lighting are US-based e-commerce platforms selling decorative lighting and premium home decor products. The platform required performance optimization, scalable storefront architecture, and improved conversion-focused shopping experiences.

- Led migration from traditional Shopify themes to React.js powered storefront architecture using Shopify GraphQL APIs and headless commerce workflows.
- Built scalable frontend systems, reusable UI components, and optimized purchase flows improving engagement and storefront performance.
- Integrated HubSpot, Klaviyo, GTM, GTag, and Microsoft Clarity for analytics, marketing automation, and user behavior tracking.
- Improved Core Web Vitals score from 53 to 89 through frontend optimization, lazy loading, image compression, and rendering improvements improving SEO visibility.

Media Firewall – AI Content Moderation Platform

2022 – 2023

Media Firewall is an AI-powered content moderation platform designed to detect abusive, harmful, and inappropriate media content through automated moderation and computer vision based workflows.

- Developed responsive React.js web application for media moderation workflows, dashboards, and content management systems.
- Worked on celebrity abuse detection model using Python, YOLO, OpenCV, and OCR libraries for automated image and content analysis.
- Built image processing pipelines for detecting abusive media patterns and extracting contextual information from uploaded content.
- Integrated frontend workflows with scalable backend moderation systems improving moderation efficiency and automation.

PERSONAL PROJECTS

RadRoom Arena – Gaming & Experience Management Platform

2024

RadRoom Arena is a gaming studio and experience management platform designed to manage gaming sessions, food ordering, loyalty rewards, leaderboard systems, user experiences, and operational workflows through customer-facing and admin applications.

- Built responsive React.js frontend applications for gaming session booking, food ordering, rewards redemption, and leaderboard management.
- Developed user authentication systems, session availability tracking, personalized customer dashboards, and booking workflows.
- Created admin dashboard for operational management including user activity tracking, booking management, and engagement monitoring.
- Implemented scalable frontend architecture and reusable UI systems improving maintainability and user experience across devices.
